

SCA 2010 to be hosted by GIT

For Immediate Release

Fredericton, NB, Canada – November 5, 2009 – During the 2009 Society of Core Analysts (SCA) Symposium in September, it was confirmed that Green Imaging Technologies would be hosting the 2010 SCA in Halifax, Nova Scotia.

As in past conferences, the 2010 SCA will include a mix of technical paper presentations, workshops, exhibits and networking events. The coastal city of Halifax will provide an ideal backdrop for this important event on the core analysis calendar. Planning is underway to provide a robust and informative conference schedule, and the social event options are shaping up to be phenomenal. As the preparations continue, more details will be released on the SCA website, www.scaweb.org.

This year's VP of Arrangements, and GIT CEO, Jill Green states, "The committee is working hard to make this the best SCA ever, and Halifax is primed to be a welcoming host city."
