

## Intelligent Company Award for Green Imaging Technologies

For Immediate Release

**Fredericton, NB, Canada – October 30, 2009** – Recently the Fredericton Chamber of Commerce held its annual Business Excellence Awards, and Green Imaging Technologies received recognition as the 2009 Intelligent Company. This award is presented each year to a Fredericton based company which has demonstrated the innovative spirit that has helped make Fredericton one of the World’s Top 7 Intelligent Communities in 2008 and 2009.

Green Imaging Technologies has deep roots in the Fredericton community, having been founded by 2 native Frederictonians, Derrick and Jill Green, who are commercializing research done at the University of New Brunswick’s MRI Research Center. While the company does business around the world, including with major oil companies, it maintains its Fredericton roots.

“We are very proud to come from Fredericton, and we are flattered by this award. It is great to be recognized by our local business community for the hard work we have been doing.” says Jill Green, CEO, “We are committed to the local community, and plan to continue to provide innovative solutions to the international oil and gas sector from our headquarters here in Fredericton.”

1 Derrick Green accepts the award
